

ABSTRACT

Biodegradable and/or bioabsorbable fibrous articles and methods for using the articles in medical applications are disclosed. The biodegradable and/or bioabsorbable
5 fibrous articles, which are formed by elctrospinning fibers of biodegradable and/or bioabsorbable fiberizable material, comprise a composite (or asymmetric composite) of different biodegradable and/or bioabsorbable fibers. Articles having specific medical uses include an adhesion-reducing barrier and a controlled delivery system. The methods include methods for reducing surgical adhesions, controlled delivery of
10 a medicinal agent and providing controlled tissue healing.
